

## **O2 Simulator Installation**

### **Disclaimer**

The O2 Simulator is for off-road use only, not intended for highway vehicles.

This modification is not a factory approved modification, and engine damage may occur. Any and all work completed must be in accordance with the manufacturers repair manual and all best practices adhered to. This modification may also violate federal, state, and, or local laws. You, the consumer, accept all liability for these modifications.

### **Required Tools**

Ratchet  
13mm socket

### **Installation**

1. Place the vehicle securely on jackstands.
2. Mount the O2 simulator on the underside of the body near the O2 connectors using the threaded hole and included bolt & washer.
3. Connect the sim to the engine harness O2 connectors.
4. Secure wires with the included zip ties.
